I carry all my own gear - everything - mics, cables, stands, everything my show needs. If you want to mic the stage amps, that's fine - you only need to mic three. Other than that, the only things my set needs from audio/stage tech are

- 1 direct box to the board for the vocal mic
- 3 black power strips with 8 ports each

This is a very clean set-up and generally, for on the fly stuff, it won't require a sound check. SM and SE can mix on the fly. Takes about 3 hrs to prep, about 10 - 15 min. to put on stage and go live.
